- **Aarialife –**

Aarialife Technologies is a leading company specializing in Enterprise Resource Planning (ERP) solutions for businesses of all sizes. Founded in 2017, they boast a successful track record of implementing ERP systems across various industries, including manufacturing, distribution, healthcare, and finance.

Here's a breakdown of their key offerings:

- **ERP Implementation Expertise:** Aarialife thrives on being your automation partner, implementing cloud-based ERP solutions to streamline your business processes [3].
- **Focus on Zoho & NetSuite:** They are established partners with Zoho and NetSuite, industry-leading ERP platforms. This partnership ensures you have access to cutting-edge solutions tailored to your specific needs.
- **End-to-End Services:** Aarialife prides itself on providing comprehensive ERP implementation services, encompassing everything from system selection and customization to data migration, training, and ongoing support.

If you're looking for a reliable partner to navigate your digital transformation journey with Zoho or NetSuite, Aarialife Technologies seems like a strong contender. You can find more information on their website: <https://www.aarialife.com>

- **Project Overview and Business Objective –**

Project Overview

Project Goal: To streamline and optimize sales, project management, and account management processes within AG INDIA PVT LTD using Zoho One.

Key Objectives:

- **Enhance Sales Efficiency:** Improve lead generation, qualification, and conversion rates.
- **Streamline Project Management:** Improve project planning, execution, and tracking.
- **Strengthen Customer Relationships:** Enhance account management and customer satisfaction.
- **Improve Data Accuracy and Accessibility:** Maintain a centralized and up-to-date database for sales and project information.

Business Objectives

Sales:

- **Increase revenue:** Drive sales growth through improved lead generation, qualification, and conversion.
- **Improve sales productivity:** Streamline sales processes and reduce time spent on administrative tasks.
- **Enhance sales forecasting:** Improve accuracy and reliability of sales forecasts.

Project Management:

- **Improve project delivery:** Enhance project planning, execution, and tracking to ensure timely and successful project completion.
- **Reduce project costs:** Optimize resource allocation and minimize project risks.
- **Improve customer satisfaction:** Deliver projects that meet or exceed customer expectations.

Account Management:

- **Strengthen customer relationships:** Build stronger and more lasting relationships with customers.
- **Improve customer retention:** Increase customer loyalty and reduce churn.
- **Drive upselling and cross-selling:** Identify opportunities to expand business with existing customers.

Expected Benefits

- **Increased efficiency:** Streamlined processes and improved productivity.
- **Improved data accuracy:** Reliable and up-to-date information for decision-making.
- **Enhanced collaboration:** Improved communication and collaboration among sales, project management, and account management teams.
- **Enhanced customer satisfaction:** Improved project delivery and stronger customer relationships.
- **Increased revenue:** Higher sales conversion rates and expanded business opportunities.

• **Solution –**

- **Team and Estimate -**

Aarialife will allocate following team for implementation of this project.

Sr. No	Role	No. of resources
1	Project Coordinator & Developer	1+2

- **Pre-requisites**

- a. Customer will share the Zoho Admin Credentials
- b. The content for any emails or notification that is mentioned in the requirement document will be shared by Customer.
- c. The templates of related data need to be shared by Customer.
- d. A working session between Customer and Aarialife is mandatory before the execution starts.

- **Project Timeline and Milestone -**

The complete project execution will be completed in **08 – 09 Weeks (Development and Issue fixes & support)**. The current effort estimate is based on the high-level requirement shared by the customer. The actual timeline and effort may vary due to current assumption and actual implementation. The project execution cost given below will remain the same for the agreed scope of work. The Customer and Aarialife team will continuously meet every week to understand the project progress and analyze the requirement for further execution.

- **Support –**

Aarialife support team will be available during working hours (10am – 6.30pm) 5 days a week (Monday to Friday). One technical expert will be available for support during this period. Any change of requirements will be taken as a separate task/project and billed after proper requirement analysis & estimates.

Aarialife will provide 1 month each of comprehensive post-go-live support.

- **Out of Scope –**

- Integration of any third-party application other than the specified in the scope of work.
- Implementation of other Zoho application.
- Development of any new functionality not explicitly defined in the scope of the work document.

- **Project Assumptions –**

- Timely and accurate provision of data and information by stakeholders and users.
- Adherence to project timelines and milestones by all parties involved.
- Compatibility of the proposed solution with existing systems and infrastructure.
- Successful completion of any prerequisite tasks or activities necessary for the project's execution.
- Attending and participating in the Requirement Study Sessions and reviewing the submitted Document.
- Working with us in Identifying and documenting the pre-requisites.
- Provide Relevant Environment & Infrastructure.
- Providing Timely Signoffs and Approvals at each milestone closure.

- **Project Dependencies –**

- Data Structure for implementation. (forms and fields)
- Process flow documentation.
- Admin credentials.

- **Training approach**

- Define clear objectives for the training sessions, outlining what the client should be able to accomplish after completion.
- Identify the target audience for the training, including key stakeholders, end-users, administrators, and any other relevant personnel.
- Develop comprehensive training materials covering all aspects of the implemented solution.
- Include step-by-step guides, user manuals, video tutorials (Call recording)
- Conduct training sessions virtually.
- Schedule multiple training sessions to accommodate different user groups and ensure maximum participation.

- **Data migration approach**

- Assessment: Conduct a thorough assessment of the existing data to understand its volume, complexity, quality, and dependencies.

- **Data Mapping:** Create a data mapping document that maps the fields and data structures from the source systems to the corresponding fields and data structures in Zoho applications.
- **Data Transformation:** Convert data formats and perform any necessary data manipulation to ensure compatibility with Zoho applications.:
- **Data Loading:** Load the transformed data into Zoho applications using native import feature. Monitor the data loading process closely to ensure completeness, accuracy, and integrity of the migrated data.
- **Validation and Testing:** Validate the migrated data against predefined criteria to ensure that it meets the desired quality and accuracy standards. Conduct rigorous testing, including data integrity checks, reconciliation tests, and user acceptance testing, to verify the correctness of the migrated data.
- **Go-Live and Post-Migration Support:** Once the migration is complete and validated, proceed with the system's go-live.

- **Implementation Methodology –**

- **Project Plan –**

Task	W1	W2 – W5	W6	W8
Requirements Gathering Sessions				
Designing and Implementation				
Internal Testing				
UAT by Customer				
Training the users				
Admin Training				
Data Cleanup				
Data Migration / Import				
Go Live

- **Terms and Conditions**

Governing Law and Arbitration:

Any dispute or disagreement arising between the Parties in connection to this SOW, which is not settled to the mutual satisfaction of the Parties within thirty (30) days (or such longer period as may be mutually agreed upon) from the date that either Party informs the other, in writing, that such dispute or disagreement exists, shall be settled by arbitration.

The venue of arbitration shall be India and the language of arbitration shall be English and all issues and matters arising therein shall be construed in accordance with and be governed by the laws in India. The arbitral tribunal shall be composed of three arbitrators, one arbitrator to be appointed by each Party, and a third presiding arbitrator to be appointed by such arbitrators.

The award of the arbitral tribunal shall be final and conclusive and binding upon the Parties.

Limitations of Liability:

The total liability of either party in respect of any specific Statement of Work shall be limited to the fees to be paid by Customer under this SOW. Neither Party shall be liable for any indirect, consequential or ancillary loss, loss of profit, business interruptions, etc.

The role of Aarialife Technologies Pvt Ltd is of a consulting and implementation partner and any requirement like product enhancements or feature upgrade would be outside Aarialife Technologies Pvt Ltd scope.

Aarialife Technologies Pvt Ltd would escalate such requirements to Zoho product management team and keep the customer informed on the progress but Aarialife Technologies Pvt Ltd in no way would be responsible or liable for features not available in Zoho.
